Speed Fastening[®] Systems

POP[®]  **Avdel**[®]

Speed Fastening® Systems

Reduce Assembly Costs with the most effective blind fastening technology.

Holding your world together®

Speed fasteners

High precision, system-compatible function, ease of operation and quick processes are guaranteed because you can fasten continuously from magazine or bowl fed fasteners and place up to 60 fasteners per minute. For fast and reliable assembly processes.

Speed Fastening Systems can reduce assembly costs, shorten cycle times, increase productivity and reduce re-work and other quality costs. Speed Fastening Systems are well suited for use in small, medium and large batch processes as well as continuous production lines.

Installation

For smaller batches, we offer a choice of power tools and simple assembly workstations. For larger batches, multihead systems offer a cost effective solution. For continuous flow lines, we have the technology to develop fully automated assembly systems.

Applications

Speed Fastening Systems can be used to assemble metal and plastics, composite material and electronic components. With an average cycle time of less than two seconds, these systems provide a fast installation from one side (blind).

Mission

Together with our customers, we develop blind fastening systems that simplify your production process and improve the quality of your products. In every case, we not only see ourselves as a provider of fasteners, tools and machines but as a development and system partner with the objective of helping our customers improve their assembly performance.

Speed Fastening® Systems

Speed Fastening is a unique assembly system designed for rapid and reliable fastening in medium and high volume applications. Originally designed for the aviation industry, Speed Fastening Systems are now used by many of the world's foremost manufacturing companies in sectors as diverse as household goods, lighting, electronic sub-assemblies, light metal fabrication and automotive. Speed fasteners are available in a wide range of materials, finishes, lengths and diameters and are ideal for fastening metals, plastics, composites and electronic components.

Speed fasteners are single piece fasteners which are either magazine fed or fed via a vibrating bowl to a wide choice of installation equipment. This ranges from the ultra-lightweight 753 power tool to fully automated, state of the art assembly systems.

Benefits of assembly

Increased manufacturing throughput

A Speed Fastening System can be fully optimized to give cycle times of less than two seconds. This rapid, blind sided process delivers a throughput up to four times greater than a traditional threaded or riveted solution.

Reduced component handling

The fasteners are fed via a magazine or into a bowl feeder. This eliminates the need for individual component handling, saves time and reduces the potential for operator injury.

No component spillage

Because the fasteners are captively held they will not be dropped onto the floor or into the application. This avoids wasted time and improves product quality while improving the work environment.

No stem loss

Traditional breakstem rivets all too often suffer from stem loss once installed. This can lead to application rattle, electrical short circuits or worse. Speed fasteners have no stems.

Improved joint quality

Speed installation technology provides a consistent, repeatable joint. What's more, unlike threaded fasteners, there is no requirement for torque control – no more problems of stripped holes or loose joints.

Improved joint performance

Once installed speed fasteners give excellent clamp up, shear and tension performance. They are also virtually immune from vibration loosening.

Process flexibility

Speed Fastening Systems can be used for low volume, off-line batch or jobbing shop work through to flow line processes. From hand held power tools to multiheaded modular workstations, we can design a Speed Fastening System to suit your assembly requirements. A wide variety of products in many industries are assembled with these systems including automotive, electronics, domestic appliance and general industrial.

Time Analysis

Speed Fastening is the more efficient system after only 10 placed rivets.

Range Overview

Brand		Material	Key features
NeoSpeed®		Aluminum Alloy Steel Stainless Steel A4	Wide grip range High joint clamp Hole filling Very high strength
Briv®		Aluminum Alloy Steel Stainless Steel A2 Brass	Bulbed tail form Large headform High joint clamp Good joint gap closure
Rivscrew®		Steel	Threaded fastener Removable with hex key and reusable Fastens into materials up to Vickers hardness 105 Hv5
Chobert®		Aluminum Alloy Steel Brass	Internal tapered bore Controlled clamp High shear Ideal for soft and brittle materials
Double Flush Chobert®		Steel	Flush surface on both sides of the joint Reduces excess space requirements within the chassis
Grovit®		Aluminum Alloy Steel	Designed for blind hole applications Annular grooves on body For use in wood, plastics, fibreglass and aluminum
Avtronic®		Brass Aluminum Alloy	Attaches DIN 41612 connectors and other components to PCBs Annular grooves on body
Avsert®		Brass	Threaded stand-off pillars for PCBs Internally threaded bore Many stand-off heights
Avlug®		Brass	Solderable terminal posts for PCBs Rolled/knurled shank

Fasteners fed via a vibrating bowl

Magazine fed fasteners

Specifying a Speed Fastening® System

To optimize the performance of your Speed Fastening System, it is important to select the correct combination of fastener, nose equipment, mandrel and follower spring. It is also critical to ensure that the combination selected is suited for use with your choice of installation process. If you need any help in specifying the required components, do not hesitate to contact your local STANLEY Engineered Fastening representative. Further information on corrosion, safety and RoHS can be found on our website www.StanleyEngineeredFastening.com.

Fastener Selection

Standard Fasteners

Removability

Rivcrew® fasteners are ideal for applications requiring disassembly for repair or rework. They can simply be unscrewed using a standard hex allen key.

Clamp

Briv® fasteners should be specified in applications requiring high clamp loads. NeoSpeed® fasteners combine high clamp throughout a wide grip range. Chobert® fasteners provide a lighter, controlled clamp making them ideal for softer or low strength materials.

Head Style

Fasteners are available with dome head. NeoSpeed®, Briv® and Chobert® are also available with countersunk head style. Other head diameters may also be available as specials – please contact your local STANLEY Engineered Fastening representative.

Specialist Fasteners

Avtronic®

Designed for attaching DIN and other connectors, card ejectors and heatsinks to printed circuit boards.

Avsert®

Cost effective stand-off pillars for printed circuit boards.

Avlug®

Cost effective terminal posts for printed circuit boards.

Fastener Material & Surface Finish

Speed fasteners are available in Stainless Steel, Steel, Aluminum and Brass. The choice of material should be made on the basis of performance (shear and tensile strength), suitability for use with the parent material and corrosion resistance. For performance data please see the relevant technical data sheets.

Typical placing sequence

1. The mandrel with pre-loaded fastener is located in the hole.

2. Tool activation pulls the mandrel through the fastener, expanding it within the hole to provide high clamp and secure joints.

3. At the end of the installation cycle, the next fastener is automatically delivered to the nose of the tool, ready to repeat the assembly process.

Please visit our website www.StanleyEngineeredFastening.com for fastener placing animations.

The surface finishes for speed fasteners are as follows:

Steel

Zinc plate and clear passivation
Option:
Epoxy paint
Zinc-nickel (with clear or black passivation)
Organic coatings

Aluminum Alloy

Natural
Option:
Anodizing (clear or color dyed)
Epoxy paint

Stainless Steel

Passivated

Brass

Brightened
Tin plated (for solderability)

Almost all our fastener families may be specified with alternative surface finishes to provide increased corrosion resistance or a specific color to suit your special application.

POP® Avdel® Speed Fastening® Systems

This selection guide is designed to illustrate which fasteners may be the most suitable for your application. This guide does not include the full range of POP Avdel products; our Applications Engineers are available to advise as to the best solution for your specific application needs.

Selection Guide

This table is designed as a guide to help you select the most suitable speed fastener for your particular application. Full technical and performance data can also be found on our website or contact your local STANLEY Engineered Fastening representative.

NeoSpeed® Wide Grip Range

Speed fasteners with a unique splined rivet design combine high clamp throughout a wide grip range - simply the strongest, most versatile speed riveting system in the world.

Key features and benefits

- The NeoSpeed fastening process delivers a throughput up to four times greater than traditional threaded or breakstem fasteners
- Multi-grip capability accommodates wide variations in material thickness
- One rivet can be used to replace several standard grip fasteners
- External splines fill rear sheet and oversize front sheet holes
- 3x greater hole size tolerance than standard breakstem rivets
- Far less sensitive to application variations
- Easier specification due to one-rivet x one mandrel solution
- Typically half the installed weight versus an equivalent breakstem rivet
- Supply options: paper magazine of fasteners or pre-loaded disposable mandrel (Cartridge)

Specifications

Sizes:

1/8" to 3/16"

(3.2 mm to 4.8 mm)

Materials:

Aluminum Alloy, Steel,

Stainless Steel A4

Head Styles:

Mushroom, Countersunk

Avdel Patent protected.

Typical placing sequence

Please visit our website www.StanleyEngineeredFastening.com for fastener placing animations.

Assembly applications

- Automotive
- Electronics
- Domestic appliances
- Electrical equipment
- General light fabrication

Airbags

Interior

Seat & trim

Heating

Rapid action door

Computer cabinet

Solar panel

Briv[®] High Shear, High Clamp Fasteners

Speed fasteners with a bulbed tail provide consistent high clamp and shear. Can be used to assemble many materials including metal, plastic and aluminum alloy.

Key features and benefits

- Bulbed tail and foreshortening of the fastener during installation ensures high clamp
- Bulbed tail and large head style provide a large bearing area for soft materials
- Tapered tail for ease of hole entry
- Expands radially during installation to ensure maximum hole fill
- Lower in-place costs than welding or nail rivets
- Bright tin plated brass option for ease of soldering and good electrical conductivity
- Stainless Steel option for applications subject to high temperature or corrosion
- Can be bowl fed for larger volume applications using automated equipment

Specifications

Sizes:

3/32" (2.4 mm) to 6 mm

Materials:

Aluminum Alloy, Steel,
Stainless Steel A2, Brass

Head Styles:

Dome, Countersunk

Typical placing sequence

Please visit our website www.StanleyEngineeredFastening.com for fastener placing animations.

Assembly applications

- Automotive
- Electronic components
- Sheet metal
- Electrical engineering
- Domestic appliances
- Furniture
- General light fabrication

Vacuum pump for diesel engines

Domestic heating systems

Office furniture

Computer cabinet

Automotive plastic connector to moulded chassis

Automotive stereo speaker

Chobert® For Soft and Brittle Materials

Speed fasteners which provide consistent controlled clamp, ideal for soft or brittle materials.

Key features and benefits

- Internally tapered bore ensures consistent light clamp to reduce potential damage to materials
- Expands radially during installation to ensure maximum hole fill
- Lower in-place costs than welding or nail rivets
- Ideal pivot pin or hose tail
- Bright tin plated brass option for ease of soldering and good electrical conductivity
- Can be bowl fed for larger volume applications using automated equipment

Specifications

Sizes:

3/32" to 1/4"
(2.4 mm to 6.4 mm)

Materials:

Aluminum Alloy,
Steel and Brass

Head Styles:

Dome, Low Profile,
Countersunk

Typical placing sequence

Please visit our website www.StanleyEngineeredFastening.com for fastener placing animations.

Assembly applications

- Automotive
- Electronic components
- Sheet metal
- Electrical engineering
- Injection moulded components
- Switchgear
- Domestic appliances
- General sheet metal
- General light fabrication

Window hinge

Alloy tube with nylon bush

Computer rack glass door hinge

Housing for car alarm

Composite material latch for wheel cover

Cooler

Double Flush Chobert®

Speed Fastening® rivet with countersunk head for use in exceptionally thin sheet materials. Based on the Chobert design, it is an ideal solution for fastening in the electronics industry and other applications where rear protrusion and rivet stem loosening are undesirable.

Key features and benefits

- Flush surface on both sides of the joint*
 - Reduces excess space requirements within the chassis
 - Common hole form can be used throughout the chassis design to reduce complexity
 - Expands radially in the material during installation
 - Can be installed from either direction if accessible
 - Provides superior joint strength when compared to competitive technologies
 - One-piece fastener eliminates potential stem fall out that can cause electrical problems
- * Rear sheet tail protrusion of installed fastener up to .020" is permissible

Specifications

Size:
1/8" (3.2 mm)
Material:
Steel
Head Style:
Countersunk

Typical placing sequence

Please visit our website www.StanleyEngineeredFastening.com for fastener placing animations.

Assembly applications

- Computer chassis
- Electronic devices and components
- Automotive applications
- Domestic appliances
- HVAC
- General thin sheet fabrications where material cost and blindside space is at a premium

Computer chassis

Gas firing

Grovit[®] For Blind Hole Applications

Designed for blind hole applications in wood, plastics, fibreglass and aluminum. Can also be used in harder substrates.

Key features and benefits

- Annular grooves on the body expand radially during installation
- Provide a vibration resistant joint and increased pull-out resistance

Specifications

Sizes:

3/32" to 3/16"

(2.4 mm to 4.8 mm)

Materials:

Zinc plated Steel and
Aluminum Alloy

Head Style:

Dome, Countersunk

Typical placing sequence

Please visit our website www.StanleyEngineeredFastening.com for fastener placing animations.

Assembly applications

- Automotive
- Domestic appliances
- Electrical equipment
- Injection moulded components

Grovit fastener in timber

Trouser press

Trouser press (detail)

PVC connector block in air conditioning unit

Grovit fastener used as a quick connect low pressure bleed hose

PVC strip connector

Rivscrew[®] Threaded, Removable Fasteners

Threaded, removable speed fasteners that combine the speed of rivet placement with the removability of a screw.

Key features and benefits

- Expands radially during installation to form a thread in host material, eliminating the risk of over torquing and strip-out
- Placed using a hexagon mandrel which expands the threaded diameter radially, adjacent to its six corners
- Removable for servicing with a hex key and reusable
- Providing a higher vibration resistant “thread lock” in the parent material compared to standard screws
- Can be used to fasten most materials up to Vickers hardness 105 Hv5
- Eliminates the need for costly tapping or thread-forming operations
- Bright tin plated steel option for ease of soldering and good electrical conductivity
- Can be bowl fed for larger volume applications using automated equipment

Specifications

Sizes:

2.8 mm to 4.8 mm

Material:

Zinc plated Steel

Optional: tin plated

Head Style:

Dome*

*The placed head style depends on the nose equipment used, standard Rivscrew nose equipment gives a dome head style.

Typical placing sequence

Please visit our website www.StanleyEngineeredFastening.com for fastener placing animations.

Assembly applications

- Aluminum die-cast boxes
- Cast magnesium
- Semi-conductors to thin wall and extruded heatsinks
- Semi-conductors to PCBs
- PCBs to chassis assemblies
- Fastening into injection moulded plastic bosses
- General engineering involving plastics, nylon, polycarbonate etc.

Rivscrew is removable and reusable

Alternator diode plate to nylon moulding

Automotive die-cast chassis with PCB

Semi-conductors to heatsinks and printed circuit boards

Heatsinks to processor cartridges

Seat belt tensioner

Rivscrew[®] PL For Plastics

Threaded, removable speed fasteners that combine the speed of rivet placement with the removability of a screw.

Key features and benefits

Rivscrew PL fasteners have the same features and benefits as the standard Rivscrew fastener plus:

- Especially designed for soft and hard plastics
- Special thread design for a wide range of plastics with a flexural modulus between 340,000 and 1,400,000 p.s.i (2,000 to 10,000 N/mm²)
- Wide grip range from .118 to .465" (3.0 to 11.8 mm) covered by one fastener

Specifications

Sizes:

3.0 mm to 4.5 mm

Material:

Zinc plated Steel

Head Style:

Dome

Avdel Patent Protected

Typical placing sequence

Please visit our website www.StanleyEngineeredFastening.com for fastener placing animations.

Assembly applications

- Automotive components
- Lighting
- Plastic trim
- Home electronics
- Domestic appliances
- Toys
- Plastic enclosures

Removable and reusable

Electric components

Head lamps

Printer & copiers

Dust cleaner

Fender attachment

Avtronic® For Attaching Connectors to PCBs

Initially designed to attach DIN 41612 connectors to PCBs but can also be used to attach a wide range of other connectors and components.

Key features and benefits

- Annular grooves on the body expand radially during installation
- Provide a vibration resistant joint, increased pull-out resistance and good residual clamp
- Various body lengths provide a wide grip range to accommodate most combinations of connector and PC board thickness
- Ideal tack rivet
- Can be used in blind hole applications

Specifications

Sizes:

2.5 mm and 2.8 mm

Materials:

Electro tin plated Brass
and Aluminum Alloy

Head Style:

Dome

Typical placing sequence

Please visit our website www.StanleyEngineeredFastening.com for fastener placing animations.

Assembly applications

- DIN and other connectors
- Heatsinks
- Card ejectors
- Brackets and stiffener bars

Surface mounted connectors to PCBs

Electronic component attachment

DIN 41612 male edge connector

Automotive vertical mounted connectors

Traffic light reflector and contact point

Avsert® Threaded Stand-off Pillars for PCBs

Threaded stand-off pillars for PCBs in a range of metric internal threads and many stand-off heights.

Key features and benefits

- Internally threaded bore takes a threaded part e.g. D-subminiature connectors
- Available in many stand-off heights to accommodate a wide variety of components
- Can be used for board thicknesses of .032 – .079" (short spigot) or .032 – .094" max (long spigot).
- Suitable as a female mating bush for D-subminiature connectors

Specifications

Sizes:

M2.5 x 0.45 and

M3 x 0.5 threads

Material:

Tin plated Brass

Typical placing sequence

Please visit our website www.StanleyEngineeredFastening.com for fastener placing animations.

Assembly applications

- Aluminum geartrays and extrusions
- D-connectors
- PCBs
- Telecommunications equipment

Stand-off pillar

DB25 subminiature connector
4.40 UNC female

Female mating bush

Avlug® Solderable Terminal Posts

Secure, easy-to-solder terminal posts for PCBs.

Key features and benefits

- Rolled/knurled shank ensures secure placement in the PCB
- Suitable for wire wrapping or a test point for CRO tubes
- Available with diameters as small as 1/16" (1.6 mm) for assembly of smaller components

Specifications

Sizes:

1/16" to 1/8"

(1.6 mm to 3.2 mm)

Material:

Electro tin plated Brass

Head Style:

Dome

Typical placing sequence

Please visit our website www.StanleyEngineeredFastening.com for fastener placing animations.

Assembly applications

- Terminal posts
- Wire wrap

Terminal post - wire wrap

Customized Designs

As you would expect from a leader in fastening solutions, we can design and manufacture Speed Fasteners with a wide variety of forms and finishes to meet your unique assembly requirements. Shown below are just a few examples of our customized capabilities. Whether you require custom fastener geometry, a particular finish, different fastener material, limited access tooling, or anything else not offered as standard product, please contact us to discuss your special requirements.

NeoSpeed® Speed Fastener - Black Anodized Finish

- Aluminum, black anodized
- More wear & corrosive resistant part

Briv® Speed Fastener - Customer specific painted finish

- Aluminum
- Custom painted finish

Briv® Speed Fastener - Anodized to Customer Color & Head Marking

- Aluminum - blue anodized
- Customer logo on part for tamper resistance

Chobert® Speed Fastener - Stand-off Rivet

- Aluminum, natural
- Very large flange shouldered stand-off rivet

Speed Fasteners - Hose Barb

- Aluminum, natural
- For use on compressed air tubes

Avplas® Speed Fastener - Removable

- Aluminum, natural
- Removable fastener for plastics

Avlug® Miniature Speed Fastener - Solderable Terminal Post

- Brass, Tin plated
- Solderable Terminal Posts
- Diameter 1/16" (1.6 mm)

Miniature Speed Fastener

- Aluminum, natural
- For use in electronic applications
- Diameters 1/16" - .078" (1.6 - 2.0 mm)

Installation Systems

From cost-effective power tools to custom assembly systems, Speed Fastening® equipment offers rapid and reliable assembly to meet your specific requirements. The equipment is an integral part of the Speed Fastening System and offers the following benefits:

- High speed, reliable fastener feed
- Assembly cycle times within two seconds
- Single side assembly
- Simple operation
- Quick reload
- Low maintenance costs
- Ideal for low volume batch work through to fully automated assembly lines

Power Tools

For low volume production up to 500,000 fastener p.a.

Power tools

753 Standard tool

7537 Power tool

Workstations

For medium volume production from 250,000 up to 1,000,000 fastener p.a.

Workstations

7535 Pantograph workstation

Mini-MAS

Assembly Workstations

For high volume production > 1,000,000 fastener p.a.

Bespoke systems

Twin head fixed pitch workstation

23 placing heads to assemble a computer chassis

Power Tools

7530 Power Tool

High performance, hydro-pneumatic power tool in heavy duty plastic, designed for rapid, blind side installation of speed fasteners. The intensifier is separated from the power tool. One tool places all speed fasteners except 1/16" (1.6 mm) Avlug®. For 1/16" Avlug use the 7536 power tool.

- Average cycle time of less than 2 seconds to increase productivity – up to 1500 fasteners per hour
- High capacity, magazine fed fasteners reduces component handling and subsequent spillage
- Robust & durable construction makes it suitable for most industrial environments
- Lightweight construction (split power tool and intensifier) and low actuation recoil reduces operator fatigue
- Available with in-line handle or bottom hose configuration
- Low maintenance power tool maximizes productive time – no requirement for specialist maintenance training
- Long life, self priming intensifier provides consistent actuation and hence joint formation
- Long reach barrel for use in many difficult access applications

753 Standard tool

Suspended

7536

Autoload

A suspended version is available that can be supported on a balancer to be quickly and easily moved or discarded – reducing downtime and operator fatigue.

The Autoload system is ideal for high volume production > 5,000,000 fasteners per year. Autoload provides bowl fed fasteners to minimise reloading downtime and maximize productivity. The fasteners are automatically loaded onto the mandrel. When fasteners on one mandrel are spent, the tool is placed in the nest, and the system inserts a fully-loaded replacement into the modified 753 tool. The system features an operator interface board that displays real-time reports on machine cycles and fault diagnostics. The data also can be linked to a network allowing off-site monitoring and maintenance.

Power Tools

7537 Power Tool

Lightweight, hydro-pneumatic power tool with integrated intensifier places all speed fasteners except 1/16" (1.6 mm) Avlug® fastener.

- Average cycle time of approx. 1 second increases productivity
- No need for long umbilical makes it flexible to use in different production environment
- Specially toughened plastic body and heavy duty rubber base increase the impact resistance and durability
- Can place the same range of fasteners and uses the same nose equipment as 7530 power tool
- Ease of maintenance due to integral cycle counter
- Patent Protected features

7537

Workstations single-head

These single-head workstations can place the entire range of Speed Fastening® Systems and stand out for their ergonomic design. Rapid assembly makes them cost-effective, even with small batch sizes. Simple to operate, high mobility and easy integration into the production process are the main features. Time-consuming training of an operator is not necessary. The hydraulic riveting units provide a smooth and shock-free riveting, ideal for sensitive components. All tools only require compressed-air supply.

Pantograph Workstation

- Tool supported on an extendable arm
- Wide arm reach to over 31.5" (0.8 m)
- Single hand operation
- The arm can be moved around the worktop to make space for other tasks
- Intensifier can be bench or floor mounted

Fixed Arm Workstation

- Tool supported on a fixed arm
- Foot pedal control, leaving both hands free to position the workpiece
- Easy alignment of workpiece
- Height adjustable arm to meet the operator's precise ergonomic needs

Underbench Workstation

- Cost-effective workstation, requiring minimum space
- Mounted below the worktop leaving a free work surface
- Foot pedal control, leaving both hands free to position the workpiece
- Easy alignment and precision assembly of small components
- Integral safety guard

7535 Fixed arm workstation

Workstations Multi-head

Mini-MAS

The Mini-MAS is a twin-head assembly station for fast, parallel assembly with compact and ergonomic design making it very easy to integrate into existing assembly lines.

- Double-head parallel riveting optimizes your assembly and increases the quality of the joining
- The rivets are presented in pairs and provide practical jig points for your components
- Possible linear positioning of one riveting module provides progressive adjustment of the riveting pitch from 1.142" up to 4.724" (close pitch version .669" – 4.252")
- Suitable for many applications
- Hydraulic riveting modules provide smooth and shock-free riveting
- Activation by a foot pedal, leaving the hands free for component handling
- Seated workstation (stand version optional available)
- ESD construction as an option

Mini-MAS

Standard nose equipment

Close pitch version

Multi-head Assembly Workstations

Multi-head assembly workstations are designed for the synchronous placement of multiple fasteners. Systems can be simple fixed, two head workstations or complex systems where as many as 60 fasteners can be placed at the same time. Most multi headed systems are customized to some extent which means that the user can enjoy the benefits of an assembly solution designed to their own specific requirements.

- Synchronous fastener placement maximizes productivity and throughput
- In built fixturing reduces assembly time
- Modular assembly technology reduces maintenance costs
- Diagnostics capability improves quality control; preventive maintenance regimes can be implemented
- These workstations can be readily integrated into existing production facilities

Assembly Workstations

Automated Assembly Systems

Automated assembly systems are designed for integration within production lines and offer a complete operator free assembly solution for highest levels of productivity.

- Bowl fed fasteners for continuous fastening
- In line integration
- Diagnostic capability through operator interface
- Modular design with simple equipment access for simple maintenance processes

MIRS System to assemble vacuum pumps

PMP System

29 placing heads to assemble computer chassis

10 placing heads to assemble automotive sealing strips

Nose equipment with addition of a twist cam to ease and speed up the nose jaw opening thus the pod reloading procedure.

Ensembles de nez avec, en plus, une came facilitant et accélérant l'ouverture du nez de pose, et donc le rechargement en fixations.

Zum leichteren Magazinieren haben diese Mundstücke durch einen Drehring zu öffnende Mundstückschnäbel.

Equipaggiamento con l'aggiunta di una camma per facilitare e rendere più veloce l'apertura della testata e pertanto la procedura di ricarica dell'astuccio portarivetti.

Boquillas que incorporan una leva para facilitar y hacer más rápida la apertura de la boquilla y el procedimiento de carga.

Applications with no or little access restrictions.

Pour applications ne présentant que peu ou pas de contraintes d'accès.

Für alle gut zugänglichen Nietpunkte.

Adatta per applicazioni senza restrizioni di accesso o con restrizioni di accesso limitate.

Apta para aquellas aplicaciones sin ninguna o pocas restricciones de acceso.

** : We recommend tin plated parts 1833 Series are installed within 9 months from the date they were produced.
 Nous conseillons d'utiliser les pièces en laiton étamé du série 1833 sous un délai de 9 mois après la date de production.
 Wir empfehlen, verzinnnte Nieten der Serie 1833 innerhalb 9 Monaten nach Produktionsdatum zu verarbeiten.
 Raccomandare di utilizzare i prodotti stagnati serie 1833 entro 9 mesi a decorrere dalla data di fabbricazione.
 Recomendamos utilizar sus piezas estañadas serie 1833 antes de 9 meses desde la fecha de su fabricación.

Optional on request / sur demande / auf Anfrage / su richiesta / bajo petición:

For brightened Brass finish replace 01833 with 01831 / Pour finition brillante remplacer la série 01833 par 01831 /
 Für Oberfläche blank ersetzen Sie 01833 durch 01831 / Per finitura brillante sostituire 01833 con 01831 /
 Para acabado brillante cambiar 01833 por 01831

Optional on request / sur demande / auf Anfrage / su richiesta / bajo petición:

Dome head bright Brass: replace part no. 01143 with 01141. Details on request.
Tête plate Laiton brillante: remplacer la série 01143 par 01141. Détails sur demande.
Flachrundkopf Kupfer-Zink-Legierung blank: ersetzen Sie 01143 durch 01141. Details auf Anfrage.
Testa tonda Ottone brillante: sostituire 01143 con 01141. Dettagli su richiesta.
Cabeza alomada Latón brillante: cambiar 01143 por 01141. Más información bajo petición.

Dome head nickel plated Brass: replace part no. 01143 with 01147. Details on request.
Tête plate Laiton nickelé: remplacer la série 01143 par 01147. Détails sur demande.
Flachrundkopf Kupfer-Zink-Legierung vernickelt: ersetzen Sie 01143 durch 01147. Details auf Anfrage.
Testa tonda Ottone nichelato: sostituire 01143 con 01147. Dettagli su richiesta.
Cabeza alomada Latón niquelado: cambiar 01143 por 01147. Más información bajo petición.

Countersunk head bright Brass: replace part no. 01143 with 01142. Details on request.
Tête fraisée Laiton brillante: remplacer la série 01143 par 01142. Détails sur demande.
Senkkopf Kupfer-Zink-Legierung blank: ersetzen Sie 01143 durch 01142. Details auf Anfrage.
Testa svasata Ottone brillante: sostituire 01143 con 01142. Dettagli su richiesta.
Cabeza avellanada Latón brillante: cambiar 01143 por 01142. Más información bajo petición.

Countersunk head electro tin plated Brass**: replace part no. 01143 with 01144. Details on request.
Tête fraisée Laiton étamage électrolytique**: remplacer la série 01143 par 01144. Détails sur demande.
Senkkopf Kupfer-Zink-Legierung verzinkt**: ersetzen Sie 01143 durch 01144. Details auf Anfrage.
Testa svasata Ottone stagnato**: sostituire 01143 con 01144. Dettagli su richiesta.
Cabeza avellanada Latón estañado electrolítico**: cambiar 01143 por 01144. Más información bajo petición.

Countersunk head nickel plated Brass: replace part no. 01143 with 01148. Details on request.
Tête fraisée Laiton nickelé: remplacer la série 01143 par 01148. Détails sur demande.
Senkkopf Kupfer-Zink-Legierung vernickelt: ersetzen Sie 01143 durch 01148. Details auf Anfrage.
Testa svasata Ottone nichelato: sostituire 01143 con 01148. Dettagli su richiesta.
Cabeza avellanada Latón niquelado: cambiar 01143 por 01148. Más información bajo petición.

Applications with no or little access restrictions.

Pour applications ne présentant que peu ou pas de contraintes d'accès.

Für alle gut zugänglichen Nietpunkte.

Adatta per applicazioni senza restrizioni di accesso o con restrizioni di accesso limitate.

Apta para aquellas aplicaciones sin ninguna o pocas restricciones de acceso.

Allows access into very restrictive applications.

Permet d'accéder à des applications à accès très limité.

Für eng an den Bauteilseiten anliegende Nietpunkte.

Consente l'accesso ad applicazioni con serie restrizioni di accesso.

Permite el acceso en aplicaciones de acceso extremadamente limitado.

Allows more penetration into applications.

Permet une pénétration supérieure dans les applications sans autres contraintes d'accès.

Für tiefsitzende und eng an den Bauteilseiten anliegende Nietpunkte.

Consente una penetrazione maggiore nell'applicazione senza altre restrizioni di accesso.

Permite una mayor profundidad de acceso en aquellas aplicaciones sin restricción de acceso en anchura.

Nose equipment with addition of a twist cam to ease and speed up the nose jaw opening thus the pod reloading procedure.

Ensembles de nez avec, en plus, une came facilitant et accélérant l'ouverture du nez de pose, et donc le rechargement en fixations.

Zum leichteren Magazinieren haben diese Mundstücke durch einen Drehring zu öffnende Mundstückschnäbel.

Equipaggiamento con l'aggiunta di una camma per facilitare e rendere più veloce l'apertura della testata e pertanto la procedura di ricarica dell'astuccio portarivetti.

Boquillas que incorporan una leva para facilitar y hacer más rápida la apertura de la boquilla y el procedimiento de carga.

Type

1 - 7 Flat / Plat / Flach / Piatta / Plana

8 Tapered / Biseauté / Spitz / A punta / Conica

9 Universal / Universel / Für erhöhte Klammerkraft / Universale / concava

10 Recessed / En retrait / Spezial / Incassata / Apriete

Allows more penetration into applications.

Permet une pénétration supérieure dans les applications à accès limité.

Für tiefsitzende und eng an den Bauteilseiten anliegende Nietpunkte.

Consente una penetrazione maggiore nelle applicazioni con restrizioni di accesso.

Permite una mayor penetración en las aplicaciones con acceso limitado.

dimensions in inch and (mm) / en pouces et (millimètre) / alle Maße in Zoll und (mm) / in pollici e (millimetri) / en pulgadas y (milímetros)

1) Dimensions B and D are generated during the installation process and should only be used as an indication of the minimum space required.

Les cotes B et D ne sont données qu'à titre et représentent l'encombrement maximal de la tête du Rivcrew après pose.

Maße B und D werden während der Verarbeitung erzeugt und sollten nur als Anhaltspunkt für den minimalen Platzbedarf verwendet werden.

Le dimensioni B e D sono generate durante il processo d'installazione e devono essere usate solo come un'indicazione del minimo spazio richiesto.

Las dimensiones B y D se conforman en el proceso de colocación y deben tomarse como orientativas para comprobar el espacio mínimo necesario.

Rivscrow® 1722 / 1723 Series

Head forming / a formage de tête / kopfformend / a formatura di testa / Tipo de boquilla

Applications with no or little access restrictions.

Pour applications ne présentant que peu ou pas de contraintes d'accès.

Für alle gut zugänglichen Nietpunkte.

Adatta per applicazioni senza restrizioni di accesso o con restrizioni di accesso limitate.

Apta para aquellas aplicaciones sin ninguna o pocas restricciones de acceso.

Allows more penetration into applications. Permet une pénétration supérieure dans les applications sans autres contraintes d'accès. Für tiefsitzende und eng an den Bauteilseiten anliegende Nietpunkte.

Consente una penetrazione maggiore nell'applicazione senza altre restrizioni di accesso.

Permite una mayor profundidad de acceso en aquellas aplicaciones sin restricción de acceso en anchura.

Rivscrow® 1772/1733 Series & Rivscrow® PL

Applications with no or little access restrictions.

Pour applications ne présentant que peu ou pas de contraintes d'accès.

Für alle gut zugänglichen Nietpunkte.

Adatta per applicazioni senza restrizioni di accesso o con restrizioni di accesso limitate.

Apta para aquellas aplicaciones sin ninguna o pocas restricciones de acceso.

Nose equipment with addition of a twist cam to ease and speed up the nose jaw opening thus the pod reloading procedure. Ensembles de nez avec, en plus, une came facilitant et accélérant l'ouverture du nez de pose, et donc le rechargement en fixations.

Zum leichteren Magazinieren haben diese Mundstücke durch einen Drehring zu öffnende Mundstückschnäbel.

Equipaggiamento con l'aggiunta di una camma per facilitare e rendere più veloce l'apertura della testata e pertanto la procedura di ricarica dell'astuccio portarivetti.

Boquillas que incorporan una leva para facilitar y hacer más rápida la apertura de la boquilla y el procedimiento de carga.

Rivscrow® 1733 Series

Allows more penetration into applications. Permet une pénétration supérieure dans les applications sans autres contraintes d'accès. Für tiefsitzende und eng an den Bauteilseiten anliegende Nietpunkte.

Consente una penetrazione maggiore nell'applicazione senza altre restrizioni di accesso.

Permite una mayor profundidad de acceso en aquellas aplicaciones sin restricción de acceso en anchura.

dimensions in inch and (mm) / en pouces et (millimètre) / alle Maße in Zoll und (mm) / in pollici e (millimetri) / en pulgadas y (milímetros)

Applications with no or little access restrictions.

Pour applications ne présentant que peu ou pas de contraintes d'accès.

Für alle gut zugänglichen Nietpunkte.

Adatta per applicazioni senza restrizioni di accesso o con restrizioni di accesso limitate.

Apta para aquellas aplicaciones sin ninguna o pocas restricciones de acceso.

Nose equipment with addition of a twist cam to ease and speed up the nose jaw opening thus the pod reloading procedure.

Ensembles de nez avec, en plus, une came facilitant et accélérant l'ouverture du nez de pose, et donc le rechargement en fixations.

Zum leichteren Magazinieren haben diese Mundstücke durch einen Drehring zu öffnende Mundstückschnäbel.

Equipaggiamento con l'aggiunta di una camma per facilitare e rendere più veloce l'apertura della testata e pertanto la procedura di ricarica dell'astuccio portarivetti.

Boquillas que incorporan una leva para facilitar y hacer más rápida la apertura de la boquilla y el procedimiento de carga.

Allows more penetration into applications. Permet une pénétration supérieure dans les applications sans autres contraintes d'accès.

Für tiefsitzende und eng an den Bauteilseiten anliegende Nietpunkte.

Consente una penetrazione maggiore nell'applicazione senza altre restrizioni di accesso.

Permite una mayor profundidad de acceso en aquellas aplicaciones sin restricción de acceso en anchura.

Powerful Brands. Breakthrough Solutions.

At STANLEY Engineered Fastening we believe in seeking ways to serve our customers better. We create the future by anticipating our customers needs. Through diversifying our product lines, creating unique assembly technologies and offering a breadth of service to meet the demands of industry worldwide, STANLEY Engineered Fastening provides technological solutions to over 100 different industries.

Avdel®

Avdel has been producing assembly systems since 1936 and offers a comprehensive range of fasteners and tooling.

POP®

From 2mm micro rivets to 1/4" structural rivets, POP blind rivets meet the needs of multiple markets.

Dodge®

With a focus on high-quality threaded inserts for plastics products, Dodge has been a leader in the fastening market since the 1950s.

Spiralock®

Spiralock is a technologically superior fastening system ideally suited for threaded joint applications subjected to heavy shock and vibration.

Gripco®

Gripco has been providing quality nut and threaded assembled products since 1904.

STANLEY Assembly Technologies

STANLEY Assembly Technologies supplies production solutions to the global assembly market.

Heli-Coil®

Based on a long history that began in the aerospace industry, Heli-Coil offers a vast range of high-quality thread inserts.

Tucker®

A one-sided drawn-arc welding process is the foundation of the Tucker No-Hole assembly solution.

iForm®

iForm continues a proud heritage since 1969 and represents over 40 years of creative threaded fastener application engineering.

Warren®

Whether it's plastic, metal, or a combination of the two, Warren can design a product that will suit your environment.

STANLEY®

Engineered Fastening

STANLEY Engineered Fastening, a Stanley Black & Decker Inc. Company has been revolutionizing fastening and assembly technologies for a variety of industries for more than 40 years.
