New Collar Cutter Market Release Models TM6CCLGP and TM8CCLGP

Huck Models TM6CCLGP and TM8CCLGP are designed to remove LGP HUCKBOLT® collars. TM6CCLGP is for 3/16 collars. TM8CCLGP is for 1/4 Collars. Collar cutters are attached to an installation tool in the same manner as a nose assembly. Operation of tool moves drawbar rearward - attached wedge moves a lever against collar. Lever forces collar into a set of blades that shear opposite sides of collar away.

Collar cutters are attached directly to Models 210, 212, 229, 230, 2400 and 2702. Pneudraulic Models 225/245 and 226/246 require Adapter P/N 102463. Manual Tool Model HK150 requires Adapter P/N 121991.
